

REALM OF SHADOW

PLAYER'S HANDBOOK

A Player's Guide to the Lands of Shadow
An Ultima III-Inspired Tactical Fantasy RPG

GETTING STARTED

Wilderstep Infinite Abyss is a turn-based RPG. You assemble a party of adventurers, explore an open world one tile at a time, talk to its people, take on quests, and descend into dungeons full of danger and treasure. This section covers the basics; the reference tables later in the manual fill in the details on every race, class, spell, item, and monster you'll meet.

Your progress is saved automatically as you play, so you can step away and pick up where you left off.

Choosing Your Party

A new game opens on the party formation screen, where you build the group you'll lead into the world.

The module provides a starting roster of ready-made characters, and you can also **create your own** from the button at the top of the screen. A custom character is built by picking a race and a class — your race grants innate abilities and adjusts your starting stats, while your class sets your combat role, how far you can move each turn, what weapons and armor you can equip, and which spells (if any) you can learn. The Races and Character Classes tables lay out every option so you can plan a balanced group.

Characters waiting on the sidelines sit in an **Available** pool; add any of them to fill your ranks, or remove a member to send them back. You can **reorder** the party by dragging members up and down, and order matters: the member in the first slot is your **lead** — the figure shown walking the world map, and the one who acts first in battle. A common setup puts a sturdy front-liner in the lead and keeps fragile spellcasters further back.

When your party is ready, choose **Begin** to enter the world. A good first party mixes durability, damage, and a little magic — a Fighter or Paladin to absorb hits, a Cleric or Wizard for spells, and a Thief or Ranger to handle locks and traps.

Navigating the Map

You explore the world on a grid, moving **one tile per step**.

Key	Action
↑ ↓ ← → or W A S D	Move the party one tile
Space	Wait a turn in place (the world still moves around you)
P	Party screen — roster, gold, shared stash, active effects

Key	Action
Q	Quest log — active and completed quests
L	Adventure log — the full back-buffer of in-world messages
H	Help & tips (and the soundtrack mute / volume controls)

Almost everything in the world is reached by **walking into it**. Step into a townspeople to talk, into a shop counter to browse its wares, into a locked door to try the lock, and into a quest giver to hear what they need. The same step-to-interact rule covers it all.

The world keeps moving even when you don't: townsfolk wander a little each turn. If someone drifts into a doorway and blocks your only way out, you have two ways past them. Press **Space** to **wait** — a turn passes without you moving, and they'll usually amble off on their own. Or walk into them to start a conversation and choose **Ask to Move**, and they'll politely step aside so you can pass.

Light matters once you leave open daylight. The party carries a light radius that brightens nearby tiles; a lit **Torch** or the **Light** spell extends it, and a Dwarf's Infravision lets that character see in pure darkness without one. Effects that last for a number of steps — light included — tick down as you move, so keep an eye on the Effects panel of the Party screen (**P**). If a party member can **Detect Traps** (any Thief, or a Ranger from level 3), hidden traps within your light radius show up as red marks before you blunder onto them.

A few other things you'll find out in the world: boats stay where you leave them — step onto one to sail across water, and onto land to disembark — and unattended shop counters and temples let you trade or buy healing without an NPC to broker it.

The Combat Arena

When the party meets a hostile creature, the game switches to a dedicated **battle screen**: a turn-based arena where your party lines up on one side and the enemies on the other. Turns proceed in order, and your party acts in the order you arranged on the formation screen — your lead goes first.

On a character's turn you can move up to that class's movement budget (the **Range** value in the Character Classes table — a nimble Thief covers far more ground than a Wizard) and then take one action:

Action	What it does
Attack	Strike an adjacent enemy with your equipped weapon
Range	Fire a bow, crossbow, or sling at a distant foe (consumes ammo)
Throw	Hurl a throwable item — a rock, a flask, a lit torch
Cast	Spend MP to cast a spell from your catalog

Action	What it does
Abilities	Use a combat ability such as a Cleric's Turn Undead
Use Item	Drink a potion, apply an antidote, or use another combat consumable
Equip Item	Swap the weapon or armor you're holding (uses your turn)
End Turn	Pass to the next combatant

Controls in the arena:

Key	Action
↑ ↓ ← →	Move the cursor, or step the active combatant
Enter	Activate the highlighted action / confirm a target
1–9	Pick an option from a list (target, spell, item)
Space	End your turn
Esc	Cancel the current sub-mode (e.g. back out of the target picker)

Darkness in Combat

Your character can only target monsters that he can see, so when fighting in the dark it helps to throw a torch or to cast a light spell.

There is no fleeing — once battle is joined, you fight to win or fall. The fight ends when one side is wiped out; win, and you return to the map with any spoils.

Completing Quests

Quests are offered by the world's people and markers. Walk into a quest giver and you'll see what they're asking, with the choice to **Accept** or **Decline**. Accepting adds the quest to your log.

Press **Q** at any time to open the **Quest Log**, which shows your active quests and what each still needs from you, alongside the ones you've already finished. As you meet a quest's objectives — defeating a particular foe, reaching a place, recovering an item — your progress updates automatically, and finishing a step or a whole quest is marked with a brief celebration. Rewards (experience, gold, or items) arrive as you complete the work, and some quests change the world itself, opening a path or handing you a key you'll need next.

Exploring Dungeons

Dungeons are the deep, dangerous heart of the game. Step onto a dungeon entrance on the world map to descend; you'll move through it tile by tile just like the overworld, but dungeons run **multiple**

floors deep and are far darker, so a Torch, the Light spell, or a Dwarf's Infravision becomes essential to see what's around you.

Down here you'll find monster **lair**s and waiting **encounters**. Engaging one drops you into the combat arena; importantly, a lair you clear and a placed encounter you defeat are **gone for good** — neither respawns — so every fight you win makes the dungeon a little safer to backtrack through. Watch for traps, pick or unlock the doors barring your way, and gather the treasure the depths are hiding. When you've had your fill (or found what you came for), make your way back to the entrance to return to the surface.

RACES

Each race grants a set of innate abilities and applies stat modifiers when a character of that race is rolled.

Most races level up at the same rate. The exception is the **Fast Learner** ability (Humans): a character with it levels up about **25% faster** than everyone else. See [Experience & Leveling](#) under Character Classes for how leveling works.

Race	Description	STR	DEX	CON	INT	WIS	Abilities
Dwarf	Stout and hardy, dwarves are natural miners and warriors with keen underground senses.	+2	-1	+2	0	+1	Infravision
Elf	Graceful and keen-minded, elves have a natural affinity for magic and sharp senses.	-1	+1	-1	+2	0	Nimble
Gnome	Clever and curious, gnomes combine a knack for tinkering with innate magical talent.	-1	0	0	+2	+1	Tinker

Race	Description	STR	DEX	CON	INT	WIS	Abilities
Halfling	Small and nimble, halflings are surprisingly resilient and hard to hit.	-2	+2	0	0	+1	Pickpocket
Human	Versatile and adaptable, humans excel in no single area but have no weaknesses. They learn quickly and level up faster than other races.	0	0	0	0	0	Fast Learner

CHARACTER CLASSES

Class determines combat role, movement range per turn, which weapons and armor the character can equip, and which spell catalog (if any) they cast from. **Range** is the per-turn movement budget on the battle grid.

Class	Range	Casting	Allowed Items	Abilities (min level)
Alchemist	4	sorcerer	fists, dagger, sling, cloth	Herbalism (L1) Brew Potion (L1)
Cleric	2	priest	fists, club, mace, sling, cloth, leather, chain	Turn Undead (L2)
Druid	2	sorcerer, priest	fists, dagger, club, mace, sling, cloth, leather	Dual Casting (L1) Herbalism (L1)
Fighter	4	none	fists, dagger, club, mace, sword, axe, halberd, spear, gloves, sling, short_bow, long_bow, crossbow, rock, cloth, leather, chain, plate, exotic	—
Paladin	4	priest	fists, dagger, club, mace, sword, spear, gloves, sling, short_bow, long_bow, rock, cloth, leather, chain	Turn Undead (L5) Smite Undead (L1)
Ranger	4	priest	fists, dagger, club, sword, sling, short_bow, long_bow, crossbow, cloth, leather	Pick Locks (L5) Craft Arrows (L2) Craft Fire Arrows (L5)

Class	Range	Casting	Allowed Items	Abilities (min level)
Thief	6	none	fists, dagger, club, sling, short_bow, cloth, leather	Pick Locks (L1) Detect Traps (L1) Backstab (L3) Shadow Step (L7)
Wizard	2	sorcerer	fists, dagger, club, cloth	—

Experience & Leveling

Characters earn **experience (XP)** by defeating monsters and by completing quests. Every party member who is still standing shares in the reward — each one receives the *full* amount, not a split — and a member who has fallen earns nothing until revived. XP from quests now counts toward leveling immediately, the same as XP from battle.

Each level costs more than the last. The cost of advancing from one level to the next is a base of **1,500 experience** multiplied by your *current* level:

- Level 1 → 2 costs 1,500
- Level 2 → 3 costs 3,000
- Level 3 → 4 costs 4,500, and so on.

So the total XP to reach level N is $1,500 \times N \times (N - 1) \div 2$. A character with the **Fast Learner** ability (Humans) levels up about **25% faster** — their base is 1,125 instead of 1,500, making every one of those steps cheaper across a whole campaign.

Leveling up makes a character stronger. Every new level adds:

- **Hit points** = the class's HP-per-level **plus the character's Constitution modifier** (a high-CON hero gains a little more; the total is never less than +1).
- **Magic points** (spellcasters only) = the class's MP-per-level **plus the character's casting-stat modifier**. Priest casters use Wisdom, sorcerer casters use Intelligence, and the Druid uses the average of the two. Non-casters gain no MP.

These ability modifiers are not a one-time bonus — they apply on **every** level-up, so a high casting stat compounds. A Cleric with Wisdom 16 (a +3 modifier) gains $6 + 3 = 9$ MP each level, while one with Wisdom 10 (+0) gains only the base **6**; the same Constitution math rewards a tough fighter with extra HP at every level. This is the payoff for rolling a high primary attribute.

A wounded character is partially healed by the HP and MP a level-up grants.

The per-level amounts are set by class — durable martial classes gain the most HP, while dedicated casters gain the most MP. The numbers below are added *before* the ability-score modifier described

above:

```
<!-- BEGIN GENERATED: leveling-table — run python3
docs/manual/build_class_gallery.py to refresh -->
```

Class	HP / level (base)	MP / level (base)	Casting stat
Alchemist	4	4	Intelligence
Cleric	6	6	Wisdom
Druid	6	6	Int & Wis (avg)
Fighter	8	—	—
Paladin	8	4	Wisdom
Ranger	6	2	Wisdom
Thief	6	—	—
Wizard	4	8	Intelligence

```
<!-- END GENERATED: leveling-table -->
```

So MP growth is **not** the same for every caster: a **Wizard** gains the most (8 per level), a **Cleric** and a **Druid** gain 6, a **Paladin** or **Alchemist** gain 4, and a **Ranger** gains 2. A Druid therefore gains less MP per level than a Wizard, but the same as a Cleric. Fighters and Thieves are non-casters and gain no MP at all.

Class Gallery

A closer look at each class — how it plays, and what it brings to the party. _(This section is generated from **character_classes.json**; edit the data, not the prose here.)_

Alchemist

```
<table><tr> <td width="170"></td> <td>
```

A support specialist who turns the wild into an arsenal. Alchemists forage reagents (Herbalism) and Brew Potions from level 1, keeping the party stocked with healing and buffs. They cast from the sorcerer catalog but fight poorly — only a dagger, sling, and cloth — so they shine in the back ranks as a crafter and caster.

Move 4 · Sorcerer · 4 weapon types · up to cloth armor · Brew Potion (L1), Herbalism (L1)

```
</td> </tr></table>
```

Cleric

--

The party's divine anchor. Clerics draw on the priest catalog to heal and protect, wade in wearing chain with a mace or sling, and from level 2 can Turn Undead to wither the unliving. Slow on their feet at two tiles a turn, they reward patient, central positioning over aggression.

Move 2 · Priest · 5 weapon types · up to chain armor · Turn Undead (L2)

--	--

Druid

--	--	--

The only class that wields both arcane and divine magic, thanks to Dual Casting from level 1. Druids forage for reagents as they travel (Herbalism) and fight in leather with simple weapons. Versatile but slow at two tiles a turn and squishier than a true warrior — a flexible spellcaster for players who like options.

Move 2 · Sorcerer + Priest · 6 weapon types · up to leather armor · Dual Casting (L1), Herbalism (L1)

--

Fighter

--

The workhorse of any party. Fighters command the widest armory in the game — every weapon family from fists to halberds and every armor from cloth to plate — and cover a brisk four tiles a turn. They cast no spells and have no special tricks; their strength is sheer durability and reliability, which makes them ideal in the lead slot soaking the first blows.

Move 4 · No spells · All weapons & armor · —

--	--

Paladin

--	--	--

A holy warrior who fights on the front line and channels divine power. Paladins move four tiles a turn, wear chain and wield swords and spears, Smite Undead for double damage from level 1, and gain Turn Undead at level 5. They trade the Cleric's spell depth for martial muscle — the party's anti-undead vanguard.

Move 4 · Priest · 12 weapon types · up to chain armor · Smite Undead (L1), Turn Undead (L5)

--

Ranger

--

A wilderness hunter built around ranged combat. Rangers favor bows — the crossbow included — and craft their own Arrows (level 2) and Fire Arrows (level 5) so they never run dry. They draw on a small priest catalog, pick locks from level 5, and move a nimble four tiles a turn: a self-sufficient skirmisher.

Move 4 · Priest · 8 weapon types · up to leather armor · Craft Arrows (L2), Craft Fire Arrows (L5), Pick Locks (L5)

--	--

Thief

--	--

The fastest, sneakiest member of any party, covering six tiles a turn. Thieves pick locks and spot traps from level 1, land devastating Backstab criticals with daggers from level 3, and at level 7 can Shadow Step to move again after striking. Lightly armored and non-magical, they win through speed, utility, and hit-and-run positioning.

Move 6 · No spells · 5 weapon types · up to leather armor · Detect Traps (L1), Pick Locks (L1), Backstab (L3), Shadow Step (L7)

--

Wizard

--

A glass cannon of raw arcane power. Wizards cast from the sorcerer catalog but are the frailest class — limited to cloth and a dagger or club, and only two tiles of movement. Keep them well behind the front line: their spells can decide a fight, but a single solid hit can end them.

Move 2 · Sorcerer · 4 weapon types · up to cloth armor · —

--	--

<!-- END GENERATED: class-gallery -->

ABILITIES

Abilities are named capabilities granted by Race or Class (or other sources). The **where** column tells you where the ability can be triggered: **battle** (combat action menu), **party** (Use button on the character sheet), or **passive** (always-on / auto-triggered).

Class Abilities

Ability	Description	Where	Duration
Backstab	Critical hits with daggers on a successful DEX save — the humble dagger becomes a devastating weapon.	passive	permanent
Brew Potion	Combine regents using the guidance of a recipe to create a potion	party	
Craft Arrows	Allows the character to craft a bundle of arrows or bolts once per day.	party	
Craft Fire Arrows	Allows the character to craft a bundle of fire arrows once per day.	party	
Detect Traps	Hidden traps are revealed before the party steps on them.	passive	permanent
Dual Casting	Access to both the priest and sorcerer spell catalogs — the only class with both.	passive	permanent

Ability	Description	Where	Duration
Herbalism	Nature lore spots reagents in the wild while travelling. Each step on a foraging tile (grass, forest, ...) has a small chance to turn up a potion reagent. Alchemists in particular benefit from a doubled find rate.	passive	permanent
Pick Locks	Pick locked doors and chests — d20 + DEX mod vs DC 12, one lockpick consumed per attempt.	passive	permanent
Shadow Step	Move after attacking — true hit-and-run play.	passive	permanent
Smite Undead	Attacks against undead creatures deal double damage	passive	
Turn Undead	Channel holy energy at every undead on the battlefield. Each one must make a Wisdom save (d20 + WIS mod vs DC 10 + caster's WIS mod) or be destroyed outright; those that succeed are still seared for 50% of their HP in radiant damage.	battle	instant

Race Abilities

Ability	Description	Where	Duration
Fast Learner	Requires only 1125 XP per level instead of the standard 1500, leveling up roughly 25% faster than other races.	passive	permanent

Ability	Description	Where	Duration
Infravision	Pierces darkness, revealing the world in shades of red. The bearer can see in absolute darkness without needing a torch.	passive	permanent
Nimble	Allows extra movement, and the ability to move after an attack	passive	permanent
Pickpocket	Attempt to steal items from town NPCs. Once per NPC, with a chance of failure.	party	permanent
Tinker	Once per in-game day, fashion any single item normally found in a general store.	party	permanent

SPELLS

Spells are MP-cost actions castable by classes that have a matching **casting_type**. The **Where** column tells you where the spell can be cast — **battle**, **party**, or **context** (contextual surfaces like the locked-door dialog).

Priest Spells

Spell	MP	Min Lvl	Range	Targeting	Where	Description
Light	3	1	0	select_tile	party, battle	Conjures a radiant orb of divine light at a chosen spot — anywhere on the battlefield.
Minor Heal	5	1	6	select_ally_or_self	battle, party	Sends a gentle wave of healing energy toward an ally or the caster.
Cure Poison	5	2	99	select_ally	battle	Draws the venom from an ally's body with a cleansing prayer, removing the poisoned condition.

Spell	MP	Min Lvl	Range	Targeting	Where	Description
Bless	10	3	0	self	battle	Invokes a divine blessing that empowers all allies, granting them greater accuracy in battle.
Curse	10	3	99	select_enemy	battle	Calls down a dark malediction on an enemy, weakening its defenses and dulling its attacks.
Major Heal	15	4	10	select_ally_or_self	battle	Channels a powerful wave of restorative energy toward an ally, mending grievous wounds.
Push	14	5	0	self	party	Emits a powerful wave of divine force that drives nearby monsters away from the party.
Mass Heal	25	6	0	self	battle	A burst of divine light radiates from the caster, restoring health to all nearby allies.

Spell	MP	Min Lvl	Range	Targeting	Where	Description
Restore	35	7	0	self	battle	A radiant pillar of divine power engulfs the party, fully restoring health and mana to all allies and purging all poisons from their bodies.

Sorcerer Spells

Spell	MP	Min Lvl	Range	Targeting	Where	Description
Shield	4	1	5	select_ally	battle	Conjures a faint magical barrier around an ally, slightly boosting their armor.
Sleep	5	1	99	select_enemy	battle	Lulls a weak-minded creature into a light magical slumber.
Magic Dart	6	1	10	directional_projectile	battle	Hurls an energy-charged dart in a straight line, stinging on impact.

Spell	MP	Min Lvl	Range	Targeting	Where	Description
Knock	6	2	1	self	context	Sends a pulse of arcane force into a lock's mechanism, rattling tumblers and wards alike. Cast from the locked-door dialog when the party bumps a lock.
Long Shanks	6	2	99	select_ally_or_self	battle	Enchants an ally's legs with unnatural speed, extending their movement range for 3 turns. May also be cast on yourself.
Magic Arrow	12	3	99	select_enemy	battle	Conjures a piercing bolt of arcane energy that streaks toward a chosen foe.
Misty Step	8	4	6	select_tile	battle	The caster vanishes in a swirl of silvery mist and reappears at a chosen location on the battlefield.

Spell	MP	Min Lvl	Range	Targeting	Where	Description
Invisibility	16	4	0	self	battle	The caster bends light around themselves, becoming invisible to enemies for 3 turns.
Charm Person	14	5	99	select_enemy	battle	Weaves an enchantment that bends the will of a humanoid creature, turning it against its allies for 3 turns.
Lightning Bolt	25	5	99	directional_projectile	battle	Unleashes a searing bolt of lightning that streaks in a straight line, electrocuting everything in its path.
Animate Dead	20	6	99	select_tile	battle	Raises a powerful skeleton warrior from the earth to fight for the caster.

Spell	MP	Min Lvl	Range	Targeting	Where	Description
Fireball	30	7	99	select_tile	battle	Hurls a massive ball of flame that detonates in a 3-tile radius, scorching everything — friend or foe — caught in the blast.

<!-- BEGIN GENERATED: items — run **python3 docs/manual/build_items.py** to refresh -->

ITEMS

Items are grouped by category — every weapon in one table, all armor in another, and everything else under General. The **Type** column names the item kind. **Weapons** list their **Base Damage** — the dice the weapon rolls before the wielder's Strength/Dexterity modifier and any magical Damage Bonus — with all melee weapons first, then all ranged weapons, each ordered weakest to strongest. **Armor** lists **Base AC**, the Armor Class a typical adventurer has while wearing it, ordered least to most protective.

Weapons

Item	Type	Base Damage	Durability	Damage Bonus	Damage Type	Special	Buy
Fists	Fists	1	0				
Club	Club	1d4-1	12				20
Dagger	Dagger	1d4-1	20			throwable	20
Mace	Mace	1d4	20				40
Sword	Sword	1d6	20				40
Spear	Spear	1d8	20				50
Broad Axe	Axe	1d8	20				0
Iron Sword	Sword	1d8	50				0
Halberd	Halberd	1d10	20				0
Rimefang Dagger	Dagger	2d6	0	1d6	ice	throwable	0
Meteorfall Mace	Mace	2d8	0	1d8	meteor		0
Sun Sword	Sword	2d8	0	1d6	fire		0
Rock	Rock	1d6+1	0			ranged, throwable	0
Sling	Sling	1d6+2	20			ranged, uses stones	60

Item	Type	Base Damage	Durability	Damage Bonus	Damage Type	Special	Buy
Short Bow	Short Bow	1d6+4	30			ranged, uses arrows	60
Long Bow	Long Bow	1d6+7	20			ranged, uses arrows	150
Crossbow	Crossbow	1d6+9	20			ranged, uses bolts	250
Silver Bow	Long Bow	1d6+9	0			ranged, uses arrows	
Dawnlight Bow	Short Bow	1d6+16	0	1d6	light	ranged, uses arrows	0
Starcaller Wand	Wand	1d6+16	0	1d8	arcane	ranged	0
Starfall Sling	Sling	1d6+16	0	1d6	meteor	ranged, uses stones	0
Stormbolt Crossbow	Crossbow	1d6+18	0	1d6	lightning	ranged, uses bolts	0

Armor

Item	Type	Base AC	Durability	Buy	Sell
Cloth	Cloth	11	0	20	10
Leather	Leather	13	20	50	25
Chain	Chain	14	50	120	60
Plate	Plate	15	20	200	150
Stoneguard Plate	Plate	18	0	0	0

General Items

Item	Type	Power	Effect	Charges	Stackable	Buy	Description
Camping Supplies	Camping Supplies	0	rest	3	✓	25	A bedroll, flint, and dried rations. Lets the party rest safely in the wilderness.
Healing Herb	Herb	15	heal_hp	1	✓	15	A fragrant herb that restores a small amount of HP.
Iron Key	Key					10	A heavy iron key that can unlock one locked door.
Lockpick	Lockpick			5	✓	8	A set of fine lockpicking tools. Consumed on each attempt.
Silver Key	Quest Item						A gleaming silver key inscribed with arcane formulae. One of the 8 Keys of Shadow.

Item	Type	Power	Effect	Charges	Stackable	Buy	Description
Torch	Torch	3		1	✓	5	A wooden torch. Lights the way in dark places.

Ammo

Item	Type	Power	Effect	Charges	Stackable	Buy	Description
Arrows	Ammo			20	✓	5	A bundle of arrows for bows.
Bolts	Ammo			20	✓	8	Heavy crossbow bolts with iron tips.
Fire Arrows	Ammo	3		20	✓	25	A bundle of fire arrows. Fire arrows explode on impact and produce the same effect as a thrown torch — they light the tile they land on and damage anyone standing in it.

Item	Type	Power	Effect	Charges	Stackable	Buy	Description
Fire Bolts	Ammo	3		20	✓	30	A bundle of fire bolts for crossbows. Tipped with the same alchemical compound as fire arrows — they explode on impact, lighting the tile they land on and damaging anyone standing in it.
Stones	Ammo			20	✓	3	A pouch of smooth stones for slings.

Potion

Item	Type	Power	Effect	Charges	Stackable	Buy	Description
Antidote	Antidote		cure_poison	1	✓	10	A bitter tincture that cures poison.
Lingering Venom	Poison Potion	2	combat_only			70	A potent toxin that persists far longer than ordinary poisons.

Item	Type	Power	Effect	Charges	Stackable	Buy	Description
Paralytic Poison	Poison Potion	2	combat_only			75	A nerve toxin that drains magical energy. Apply to a weapon or throw at enemies.
Poison Vial	Poison Potion	2	combat_only			50	A vial of toxic liquid. Apply to a weapon or throw at enemies to inflict poison damage.
Weakening Poison	Poison Potion	2	combat_only			60	A venom that saps fighting prowess. Apply to a weapon or throw at enemies.
Elixir of Strength	Potion	2	buff_strength	1	✓	60	A thick crimson brew. Grants +2 STR for the next combat.
Elixir of Warding	Potion	2	buff_ac	1	✓	60	A silver-tinted potion. Grants +2 AC for the next combat.

Item	Type	Power	Effect	Charges	Stackable	Buy	Description
Healing Potion	Potion	30	heal_hp	1	✓	40	A ruby-red elixir that mends wounds. Restores a large amount of HP.
Mana Potion	Potion	10	heal_mp	1	✓	40	A shimmering blue liquid that restores magic points.
Fire Oil	Throwable	20				35	A volatile oil that bursts into a small 3x3 gout of flame where it lands. Throw at an enemy or tile.

Quest

Item	Type	Power	Effect	Charges	Stackable	Buy	Description
Chest	Chest	0				0	A lost chest
Relic Chest	Chest	0				0	A chest containing a relic
Treasure Chest	Chest	0				0	What treasure lies inside?

Item	Type	Power	Effect	Charges	Stackable	Buy	Description
Dragonheart	Quest Item						The smoldering heart of an ancient wyrm. It beats once every few minutes, slow as the tide, and the air around it shimmers with heat.
Family Heirloom	Quest Item						A delicate silver locket engraved with a family crest. It belongs to Elara.
Shadow Crystal	Quest Item						A pulsing dark crystal radiating ancient power. The innkeeper seeks this.

Reagent

Item	Type	Power	Effect	Charges	Stackable	Buy	Description
Brimite Ore	Reagent			1	✓	15	A volatile mineral that smolders with inner heat.

Item	Type	Power	Effect	Charges	Stackable	Buy	Description
Glowcap Mushroom	Reagent			1	✓	10	A blue-capped fungus that pulses with arcane energy.
Moonpetal	Reagent			1	✓	12	A luminous flower petal that glows faintly in the dark. Prized by alchemists.
Serpent Root	Reagent			1	✓	8	A twisted root with potent cleansing properties.
Spring Water	Reagent			1	✓	3	Pure water from a mountain spring. Essential for brewing.

Scroll

Item	Type	Power	Effect	Charges	Stackable	Buy	Description
Scroll of Fire	Scroll						A single-use scroll containing a fire spell.

<!-- END GENERATED: items -->

<!-- BEGIN GENERATED: monsters — run **python3 docs/manual/build_monsters.py** to refresh -->

MONSTERS

Every monster in the game, sorted by difficulty (easy → normal → hard → deadly → boss), then by HP. **Damage** is the attack dice; **Move** is the tile budget per turn. The **Tags** column notes type (undead / humanoid — undead matters for Smite Undead and Turn Undead) and hit-and-run behaviour.

Sprite	Monster	Diff	HP	AC	Atk	Damage	Move	XP	Gold	Tags
	Goblin	easy	6	11	+2	1d4	6	10	1–6	humanoid
	Cave Bat	easy	8	12	+2	1d4	12	20	2–8	
	Giant Rat	easy	8	12	+2	1d4	10	15	2–8	
	Giant Centipede	easy	10	12	+2	1d4	8	20	2–8

FREQUENTLY ASKED QUESTIONS

This section is hand-maintained — edit it freely. It lives outside every generated block, so the data-driven builders (the Class Gallery refresher and the PDF renderer) never touch it.

How do I attack an enemy?

Walk into an adjacent enemy to make a melee attack, or pick **Attack** from the action menu to strike the first adjacent foe. For ranged weapons choose

Range and pick a target or a direction; for thrown items use **Throw**.

Why is the Range option greyed out?

A ranged weapon needs matching ammunition in the shared party stash — arrows for bows, bolts for crossbows, stones for slings. Ammo carried in a single character's personal bag does not count; move it to the party stash. Weapons that are their own projectile (a Rock, or a wand) need no ammo.

Do magic weapons lose durability?

Relic weapons have a durability of 0, which means they are indestructible — they never wear out or break, no matter how often you use them.

How do I restore HP and MP between fights?

Rest with Camping Supplies from the Party screen, or visit a temple in town. A Cleric or other healer can also cast healing spells on the party screen outside of combat.

Where do potion reagents come from?

A Druid or Alchemist in the party gathers reagents automatically while you travel across foraging terrain (grass, forest, and similar tiles). An Alchemist can then brew them into potions from the Party screen.

<!-- OPTIONAL: data-driven FAQ entries.

If you ever want part of this FAQ generated from game data (the way the Class Gallery is), wrap just that portion in a marker pair and add a small builder script that rewrites only the text between the markers — exactly the pattern in docs/manual/build_class_gallery.py. The markers look like:

[BEGIN GENERATED: faq] ...generated entries... [END GENERATED: faq]

(use real HTML-comment markers, not these square brackets). Everything outside the markers — including all of the hand-written Q&A above — stays untouched on every run.

-->

End of manual.
